

## Specification for precooling unit:

Precooling unit made of Glass-Fiber Reinforced Polyester (GRP) modular type DB with IP66 Ingress protection according to. IS 60529, Impact strength IK10 according to. IEC 62262, the enclosure is having Double-insulation (IEC 60439-1) and is also UV stabilized (IEC 62208). Temperature withstand up to 120°C, self-extinguishing 960°C according to. IEC 60695 and box should have internal gasket made up of polyurethane.

One number of 63/125 Amps Four Pole MCCB and one number CEE type Industrial socket 63/125Amps 3P+N+E (5Pin) IP67 grade confirming to IS 60301-1 & 2 with copper Busbar for Loop In Loop out Cables.

Make: Cape Electric-Safybox
